

KLAMATH BASIN AREA OFFICE MINOR ENVIRONMENTAL ASSESSMENTS

Fiscal Year – 2009

As of April 29, 2009, the Klamath Basin Area Office has adopted one Environmental Assessment (EA) through a Finding of No Significant Impact. The FONSI was signed and approved on March 17, 2009. The EA was entitled Orleans Transportation and Road Restoration Project and was authored by the United States Forest Service – Six Rivers National Forest. Reclamation's action was to provide funding to the Karuk Tribe under the Klamath Watershed Restoration Grant Program (formerly known as the Conservation Implementation Program) for road treatments including both maintenance and decommissioning. The project was being performed to enhance anadromous fish habitat and reduce the risk for spread of Port-Orford Cedar Root Disease in the Bluff Creek Watershed Fish Lake Complex.
